### Description

The product page can be divided into the following sections:

- **Product image:** The product image can be displayed under the title on the left-side, along with alternate views of the product underneath it in smaller box. Clicking on the main image will expand the image within the window for the customer to see it in greater detail.
- **Product details:** The product code, availability, and price are displayed just right to the product image.
- **Cart:** The customer can select a quantity and add the product to their cart, wishlist, or compare.
- **Rating/Sharing:** Underneath the cart can rate the product and/or share the product on different social media websites.
- **Description tab:** An area underneath the main product information to provide a detailed description of the product.
- **Review tab:** An area for the customer to write a review on the product.

Prerequisites:

- stable internet connection
- laptop or PC
- Chrome browser installed
- do not login before executing test

Test Step	Test Data	Expected Result
1. Open Chrome browser and navigate to <a href="https://demo.opencart.com/">https://demo.opencart.com/</a>		The web page opened successfully
2. Click on any product		The product page is displayed
3. The product page contains Product image: The product image can be displayed under the title on the left-side, along with alternate views of the product underneath it in smaller box. Clicking on the main image will expand the image within the window for the customer to see it in greater detail.		The product image is displayed.

Test Step	Test Data	Expected Result
4. The product page contains Product details: The product code, availability, and price are displayed just right to the product image.		The product details are displayed
5. The product page contains Cart: The customer can select a quantity and add the product to their cart, wishlist, or compare.		The customer is able to select quantity and add the product to the cart, wishlist, compare
6. The product page contains Rating/ Sharing: Underneath the cart can rate the product and/or share the product on different social media websites.		The product page contains rating/ sharing and the user can rate the products and/or share on different social media websites.
7. The product page contains Description tab: An area underneath the main product information to provide a detailed description of the product.		The description tab is displayed
8. The product page contains Review tab: An area for the customer to write a review on the product.		The review tab is displayed and the customer is able to write a reviews of the product.

### Description

The "Add to Compare" feature in the product section allows the customer to compare the different specifications, features, and price of a number of products s/he might be interested in.

The customer is given the option to add one of the compared products to the cart if they want to. Pressing "Continue" will bring the user back to the home page.

#### Prerequisites:

- stable internet connection
- laptop or PC
- Chrome browser installed
- do not login before executing test

Test Step	Test Data	Expected Result
1. Open Chrome browser and navigate to <a href="https://demo.opencart.com/">https://demo.opencart.com/</a>		The web page opened successfully
2. Go to any product page and click on the compare button ( it is below the product price, next to favorite icon)		A confirmation message is displayed "Success: You have added Your_Product_name to your product comparison!"
3. Add another product and click on the link "product confirmation" present in the confirmation message		A new page is displayed where user is able to check products and see different specifications, features. The customer is given the option to add one of the compared products to the cart if they want to. Pressing "Continue" will bring the user back to the home page.

### Description

Search box: The customers can type in the search box to search for a product within the store's product categories.

Prerequisites:

- stable internet connection
- laptop or PC
- Chrome browser installed
- do not login before executing test

Test Step	Test Data	Expected Result
1. Open Chrome browser and navigate to <a href="https://demo.opencart.com/">https://demo.opencart.com/</a>		The web page opened successfully
2. Click on the search box present under the page header in the middle of the page		The user is able to identify the search box and click on it. Once clicked the typing cursor (caret) will start blinking
3. In the search box enter "iphone" keyword using the keyboard		The related products referring to "iphone" will be displayed or in case there is no iphone on the website a message will be displayed "There is no product iphone present in the shop, try searching for another item"
