Sprint: SFOCS Sprint 11

Description

Once a product has been added to the cart, the customer can continue to the checkout to make their product purchase. The Checkout page can be accessed in the header section of every page (found under the search box). Customer checkout using OpenCart is a simple process that can be completed in 6 steps.

1. Step 1: Checkout options

The customer can log into or register their account (as explained above), or select guest checkout.

2. Step 2: Billing details

Personal details including "First Name", "Last Name", "E-mail", and "Telephone" are filled into a form. It also requires the customer's address details.

3. Step 3: Delivery details

In Billing Details, the user can check a box to indicate that the delivery details and billing details are the same. This will cause it to skip over this step to Delivery Method. If the delivery details are different from the billing details the customer can enter this information in a form in this section.

4. Step 4: Delivery method

A method of shipping is selected here. A comment box is added for the customer to add comments about their order.

5. Step 5: Payment method

The customer selects their method of payment here and may add comments in the comment box.

6. Step 6: Confirm order

In this last step, the customer will see an overview of their purchase; including the product description, quantity, and price (with tax & shipping).

**[SFOCS-13] Implement the account creation**

Agile

Epic Link: NEW graphic interface of OpenCart application
Sprint: SFOCS Sprint 10

Description

Before a customer can continue checking out a product from the shopping cart, the customer needs to select either guest checkout or log into their account. The guest checkout doesn't require log-in details. Returning customers may want to make an account with the store.

There are a few ways a customer can make an account:

[Shopping Cart](#)
[Checkout](#)

Checkout

Step 1: Checkout Options ▾

New Customer

Checkout Options:

☒ Register Account

☐ Guest Checkout

By creating an account you will be able to shop faster, be up to date on an order's status, and keep track of the orders you have previously made.

[Continue](#)

Returning Customer

I am a returning customer

E-Mail

Password

[Forgotten Password](#)

[Login](#)

Step 2: Account & Billing Details

Step 3: Delivery Details

Step 4: Delivery Method

Step 5: Payment Method

Step 6: Confirm Order

or

1. Checkout

1. Step 1 of the check out process allows the user to make an account before continuing with payment. Selecting "Register Account" will change
2. Step 2 of checkout from Billing to Account & Billing details. Account & Billing asks for the same personal details as Billing, except that it asks for the user to create a password for their account.
3. After Step 2 is completed, the customer may continue with the checkout process.

2. Header

1. "My Account" Clicking "My Account" in the header will show the option for customer to the Login or create account. This page gives the customer an option to log in if they already have an account, or create a new account. In the "New Customer" section the customer can click "Continue" under Register Account to be directed to the "Register an Account" page.

Description

Category product listings enable customers to browse products similar to other products within the same category. This is especially helpful for customers looking to compare products, a feature that will be explained under [Categories](#). The category page can be accessed a number of ways. It can be accessed from the top menu, when a customer clicks on one of the parent categories. Also, on product pages a customer can access the category product listing page by clicking on a category on the left side category block.

\$122.00

Ex Tax: \$100.00

As seen above, the category block is displayed on the left-side like it is in the product page. There is space under the Category title at the top to add a description to the category. The "Refine Search" links to sub-categories of that category for the user to browse. The products can be displayed according to the customer's preference: in a list or grid. The above image is sorted in the listing format. The products can be sorted according to name, price, rating, or model in the "Sort By" box. The number of products displayed in the product listing can be changed in "Show" from 15 up to 100.

There is a section that gives space for each of the products within the category, providing a product image, description, price, and an Add to Cart option. There is an option to add the product to a wish list. Another option for the product is to "Add to Compare".

Intel Core 2 Duo processor

Powered by an Intel Core 2 Duo processor at speeds up to 2.16GHz, the new MacBook is the fastest ever.

1GB memory, larger hard drives

The new MacBook now comes with 1GB of memory standard and larger hard drives for the entire line perfect for running more of your favorite applications and storing growing media collections.

Sleek, 1.08-inch-thin design

MacBook makes it easy to hit the road thanks to its tough polycarbonate case, built-in wireless technologies, and innovative MagSafe Power Adapter that releases automatically if someone accidentally trips on the cord.

Built-in iSight camera

Right out of the box, you can have a video chat with friends or family,2 record a video at your desk, or take fun pictures with Photo Booth

The product page can be divided into the following sections:

- **Product image:** The product image can be displayed under the title on the left-side, along with alternate views of the product underneath it in smaller box. Clicking on the main image will expand the image within the window for the customer to see it in greater detail.
- **Product details:** The product code, availability, and price are displayed just right to the product image.
- **Cart:** The customer can select a quantity and add the product to their cart, wishlist, or compare.
- **Rating/Sharing:** Underneath the cart can rate the product and/or share the product on different social media websites.
- **Description tab:** An area underneath the main product information to provide a detailed description of the product.
- **Review tab:** An area for the customer to write a review on the product.

Sprint: SFOCS Sprint 2

Description

The top menu category only displays the top parent categories of products. See [Categories](#) for more information on how to create and assign product categories.

Like the header, the top menu will be displayed on every page. When the customer's mouse is dragged over a category, a drop down menu will display the sub-categories for that parent category.

Desktops Laptops & Notebooks Components Tablets Software Phones & PDAs Cameras MP3 Players

When a parent category is clicked, the customer will be directed to the category page, which displays all the products within that category.
